*Average Projected Premium PMPM is an estimate determined by the health carrier that reflects differences in individual plan pricing, types of plans selected, metal level enrollment projections, and age, tobacco status, and geographical location of the projected membership. As such, the changes in the average projected premium PMPMs from year to year may not match, or even be particularly close to, the average percentage rate changes shown. These estimates are projections made by the company about future behavior – they do not in any way reflect actual experience. This information is included in this table for informational purposes only and is not intended to be used by individual consumers in making decisions about plan selection and enrollment.
