P.O. Box 690
Jefferson City, Missouri 65102

Re: Missouri Advisory Loss Costs and Rating Values Filing Proposed Effective January 1, 2018

Dear Director Lindley-Myers:

In accordance with the applicable statutes and regulations of the state of Missouri, we are filing advisory voluntary loss costs for Missouri to be effective January 1, 2018 for new and renewal policies.

This filing proposes an average overall change of -3.0% in the voluntary loss costs from the August 1, 2017 NCCI Voluntary Loss Costs Including Trend. Enclosed are the NCCI Voluntary Loss Costs Including Trend proposed to be effective January 1, 2018.

Please note the following in connection with this filing:

- As a result of Item B-1397, effective January 1, 2008, a single combined loss cost is still calculated for Class Codes 7710 and 7711 via a payroll-weighted average of the separately indicated loss costs for these two Class Codes.
- As a result of Item B-1435, effective January 1, 2018:
 - Class Codes 1642 and 1655 are combined to reflect the first year of a three-year transition program. In the third year of the transition, Class Code 1655 will be discontinued.
 - Class Codes 1701, 1741 and 1853 are combined to reflect the first year of a two-year transition program. In the second year of the transition, Class Codes 1741 and 1853 will be discontinued.
 - Class Codes 1860, 4279, and 4282 are combined to reflect the first year of a two-year transition program. In the second year of the transition, Class Codes 1860 and 4282 will be discontinued.
 - Class Code 2534 is discontinued and the loss cost for Class Code 2501 is payroll weighted to reflect the combined experience of Class Codes 2501 and 2534.
 - Class Codes 2791 and 2841 are combined to reflect the first year of a two-year transition program. In the second year of the transition, Class Code 2791 will be discontinued.

11430 Gravois Road, Suite 310 St. Louis, MO 63126-3635 www.ncci.com

- Class Code 3175 is discontinued and the loss cost for Class Code 3169 is payroll weighted to reflect the combined experience of Class Codes 3169 and 3175.
- Class Code 3223 is discontinued, and Class Code 3180 is established with its loss cost reflecting the combined experience of Class Codes 3180 and 3223.
- Class Codes 4053 and 4061 are discontinued and the loss cost for Class Code 4062 is payroll weighted to reflect the combined experience of Class Codes 4053, 4061 and 4062.
- Class Code 4113 is discontinued and the loss cost for Class Code 4111 is payroll weighted to reflect the combined experience of Class Codes 4111 and 4113.
- Class Code 4439 is discontinued and the loss cost for Class Code 4558 is payroll weighted to reflect the combined experience of Class Codes 4439 and 4558.
- Class Code 4597 is discontinued and the loss cost for Class Code 4557 is payroll weighted to reflect the combined experience of Class Codes 4557 and 4597.
- Class Codes 5040 and 5067 are combined to reflect the first year of a three-year transition program. In the third year of the transition, Class Code 5067 will be discontinued.
- Class Code 5069 is discontinued and the loss cost for Class Code 5059 is payroll weighted to reflect the combined experience of Class Codes 5059 and 5069.
- Class Codes 5505 and 5506 are combined to reflect the first year of a three-year transition program. In the third year of the transition, Class Code 5505 will be discontinued.
- Class Codes 7228, 7229, and 7250 are discontinued and the loss cost for Class Code 7219 is established and payroll weighted to reflect the combined experience of Class Codes 7228, 7229 and 7250.
- Class Code 7225 is established
- As a result of Item R-1413, the retrospective rating plan parameters were updated.

I hereby certify that I am familiar with the insurance laws, rules and regulations of the State of Missouri, and to the best of my knowledge, information, and belief, this filing complies in all respects to such laws, rules, and regulations. This filing is made on behalf of the members and subscribers of the National Council on Compensation Insurance, Inc., who are now writing or will write workers compensation insurance in Missouri.

This filing is made exclusively on behalf of the companies that have given valid consideration for the express purpose of fulfilling regulatory rate or pure premium filing requirements and other private use of this information.

In the enclosed appendix is a list of companies, which as of the time this filing is submitted, are eligible to reference this information. The inclusion of a company on this list merely indicates that the company, or the group to which it belongs, is affiliated with NCCI in this state, or has licensed this information as a non-affiliate, and is not intended to indicate whether the company is currently writing business or is even licensed to write business in this state.

Please contact me (314-843-4001) if you have any questions or need any further information.

Respectfully submitted,

Carla Townsend

Advisory Loss Costs and Rating Values Filing – January 1, 2018

Disclosures

Purpose of the Report

The purpose of this report is to provide the proposed voluntary loss costs for workers compensation policies in Missouri, proposed to be effective January 1, 2018. The intended users of this report are:

- The Missouri Department of Insurance, Financial Institutions and Professional Registration
- Affiliated carriers, for their reference in determining workers compensation rates

Scope

The prospective loss costs are intended to cover the indemnity and medical benefits provided under the system, as well as some of the expenses associated with providing these benefits (loss adjustment expenses). They do not, however, contemplate any other costs associated with providing workers compensation insurance (such as commissions, taxes, etc.).

Each insurance company offering workers compensation insurance in Missouri must file a loss cost multiplier to be applied to the approved advisory prospective loss costs in order to compute the final workers compensation rates they intend to charge. This multiplier is intended to cover the other costs associated with providing workers compensation insurance that are not already part of the advisory prospective loss costs.

Data Sources and Dates

The overall average loss cost level change is based on a review of Financial Call Data, which is an aggregation of workers compensation data annually reported to NCCI. In this filing, Financial Call Data submissions received after June 14, 2017 were not considered for inclusion in the analysis.

Loss cost level changes at the classification code level are based on Unit Statistical Data, which is the audited exposure, premium and loss information reported to NCCI on a policy level. In this filing, Unit Statistical Data submissions received after June 23, 2017 were not considered for inclusion in the analysis.

In some areas, NCCI's analysis also relies on other data sources, which are reviewed for reasonableness and are referenced in the filing where applicable.

Advisory Loss Costs and Rating Values Filing – January 1, 2018

Disclosures

This filing was prepared as of July 31, 2017. Therefore, events that occurred after this date that may have a material impact on workers compensation costs in this jurisdiction have not been considered in the analysis.

NCCI maintains several data reporting initiatives and programs to assist carriers to report data and to ensure that the data that is reported to NCCI is complete, accurate, and reported in a timely fashion. Occasionally, a carrier's data submission is not available for use in an NCCI filing either because the data was not reported prior to the filing, had quality issues, or NCCI determined that the data that was reported should not be included in the filing based on NCCI's actuarial judgment. Data for all carriers writing at least one-tenth of one percent of the Missouri workers compensation written premium volume have been included in the experience period on which this filing is based.

Other exclusions are made for the purposes of analysis, but do not have a material impact on the proposed changes in this filing.

Methodology

To increase consistency across states, in this filing, loss-based expenses have been removed from premium in the on-level factor calculation (see Appendix A-I). This change is purely cosmetic and has no impact on calculated values. It is expected that this revised format will be used going forward.

Risks and Uncertainty

This filing includes assumptions and projections concerning the future. As with any prospective analysis, there exists estimation uncertainty in these assumptions and projections. Areas of this analysis subject to estimation uncertainty that could have a material impact on the final results include the following:

- Projection of future loss development
- Selection of loss ratio trends
- Potential impact of changes to laws and/or regulations

In addition, any future changes to workers compensation law or regulations that apply retroactively to policies or benefit claims on policies in the proposed effective period may have a significant impact on the adequacy of the loss costs proposed in this filing.

Advisory Loss Costs and Rating Values Filing – January 1, 2018

Part 1 Filing Overview

- Executive Summary
- Overview of Methodology
- Summary of Selections
- Selections Underlying the Proposed Changes
- Additional Proposed Changes

Advisory Loss Costs and Rating Values Filing – January 1, 2018

Executive Summary

Based on its review of the most recently available data, NCCI has proposed an overall average workers compensation voluntary market loss cost level change of −3.0% to become effective January 1, 2018.

Key Components	Percentage Change
Impact of change in Experience and Development	- 1.7%
Impact of change in Trend	– 1.0%
Impact of change in Benefits	+ 0.2%
Impact of change in Loss-based Expenses	<u> </u>
Proposed Change in Overall Voluntary Loss Cost Level	- 3.0%

Key observations:

- The filing is based on premium and loss experience for policy years 2014 and 2015 evaluated as of December 31, 2016, which is moderately favorable.
- Missouri's lost-time claim frequency has declined since 2010.
- After adjusting to a common wage level, indemnity and medical average cost per case figures have remained fairly consistent in recent years

Proposed Changes in Voluntary Loss Cost Level by Industry Group:

	Average	Maximum	Maximum
Industry Group	<u>Change</u>	<u>Increase</u>	<u>Decrease</u>
Manufacturing	+ 1.0%	+ 21.0%	- 19.0%
Contracting	- 5.7%	+ 14.0%	- 26.0%
Office and Clerical	- 4.6%	+ 15.0%	- 25.0%
Goods and Services	- 2.1%	+ 18.0%	- 22.0%
Miscellaneous	- 4.6%	+ 15.0%	- 25.0%

Additional Notable Change(s) Proposed in the Filing:

Updated terrorism loss cost

Advisory Loss Costs and Rating Values Filing – January 1, 2018

Overview of Methodology

Aggregate Ratemaking

NCCl's approach to determining the proposed overall average loss cost level change utilizes widely accepted ratemaking methodologies. The approach employed in this filing includes the following steps:

- The reported historical premium totals are projected to an ultimate basis and adjusted to the current pure premium level
- The excess loss portion of individual large claims are removed from reported aggregate losses, based on a Missouri specific large loss threshold
- The reported historical limited indemnity and medical loss totals are projected to an ultimate basis and adjusted to the current benefit level
- Ratios of losses to pure premium are projected to the cost levels expected in the loss cost effective period
- Ultimate, trended, limited losses are adjusted to an unlimited basis with an excess ratio
- Proposed benefit level and/or expense changes are applied to the projected cost ratios

The indicated average loss cost level change is calculated for the years in the filing's experience period. If the final projected cost ratios are greater (less) than 1.000, then an increase (decrease) in the average loss cost level is indicated.

Class Ratemaking

Once the proposed overall average voluntary loss cost level change has been determined, NCCI separately determines loss costs per \$100 of payroll for each workers compensation job classification (class); the loss costs and year-over-year changes vary by class. Three sets of pure premiums are combined as part of each class code's loss cost calculation based on the volume of available data for that job classification. The three sets of pure premiums are:

- State-specific payroll and loss experience ("indicated")
- Currently-approved pure premium adjusted to the proposed level ("present on rate level")
- Countrywide experience adjusted to state conditions ("national")

Note: The methodology and assumptions used in this filing may not be applicable to or relevant for another purpose, including but not limited to NCCI filings in other jurisdictions.

Advisory Loss Costs and Rating Values Filing – January 1, 2018

Summary of Selections

The following is a summary of selections underlying the voluntary loss proposed to be effective January 1, 2018, along with the selections underlying the previous experience filing.

Voluntary Loss Costs	Previous Experience Filing January 1, 2017	Proposed Effective January 1, 2018
Experience Period	Policy Years 2013 and 2014	Policy Years 2014 and 2015
Premium Development	3-year average	3-year average
Basis of Loss Experience	Average of Paid and Paid+Case losses	Average of Paid and Paid+Case losses
Paid Loss Development	2-year average	3-year average
Paid+Case Loss Development	5-year average	5-year average
Tail Factors	Selected	Selected
Indemnity Annual Loss Ratio Trend Factor	0.980	0.980
Medical Annual Loss Ratio Trend Factor	0.990	0.985
Loss Adjustment Expense Provision	19.5%	18.9%
Base Threshold for Limiting Losses	\$9,695,342	\$9,794,993
Large Loss Excess Ratio	1.0%	0.6%
Classification Swing Limits (applied by Industry Group)	+/-20%	+/-20%

Advisory Loss Costs and Rating Values Filing – January 1, 2018

Selections Underlying the Proposed Changes

Experience and Development

NCCI analyzed the emerging experience of Missouri workers compensation policies in recent years. The primary focus of our analysis was on premiums and losses from policy years 2014 and 2015 evaluated as of December 31, 2016. The most recently available full policy year is 2015 since the last policy had an effective date of December 31, 2015 and did not expire until December 31, 2016. During this year's analysis, after reviewing various possible experience periods, the use of the two most recently available full policy years of data was selected as most appropriate in terms of providing balance between stability and responsiveness.

Different aggregations of loss experience were analyzed in preparation of this filing. These were (i) paid losses (benefit amounts already paid by insurers on reported claims) and (ii) the sum of paid losses plus case reserves (paid losses and the amounts set aside to cover future payments on those claims). In this filing, NCCI utilized loss development factors based on each of these two loss aggregations. This is consistent with NCCI filings made in the past several years in Missouri. Loss development factors are needed since paid losses and case reserve estimates on a given claim change over time until the claim is finally closed. The loss development factors are based on how paid losses and case reserve estimates changed over time for claims from older years. The specific development link ratio selections underlying this filing are shown below:

- A three-year average of historical premium development factors.
- A three-year average of historical paid loss development factors through a 19th report.
- A five-year average of historical paid plus case loss development factors through a 19th report.
- Loss development tail factors from a 19th report to ultimate were selected by NCCI based on historical averages of the ten most recent available factors.

Trend

This filing relies primarily on the experience from policy years 2014 and 2015. However, the proposed loss costs are intended for use with policies with effective dates starting on January 1, 2018. It is necessary to use trend factors that forecast how much the future Missouri workers compensation experience will differ from the past. These trend factors measure anticipated changes in the amount of indemnity and medical benefits as compared with anticipated changes in the amount of workers' wages. For example, if benefit costs are expected to grow faster than wages, then a trend factor greater than zero is indicated. Conversely, if wages are expected to grow faster than benefit costs, then a trend factor less than zero is indicated. While historical changes in claim frequency and average cost per case were also reviewed, NCCI applies loss ratio trend factors in the determination of the proposed overall average loss cost level change.

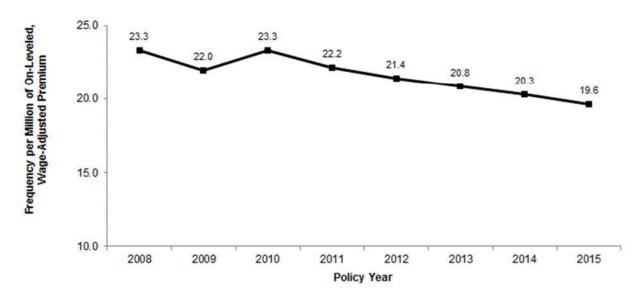

Advisory Loss Costs and Rating Values Filing – January 1, 2018

Selections Underlying the Proposed Changes

The following few charts show a measure of the number of workplace injuries (claim frequency) and the average cost of each of these injuries (claim severity).

Missouri Lost-Time Claim Frequency

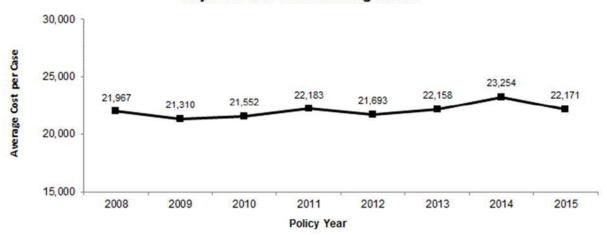

Missouri's lost-time claim frequency has declined since 2010, as shown immediately above. The data in this chart reflects premiums at today's loss cost and wage levels.

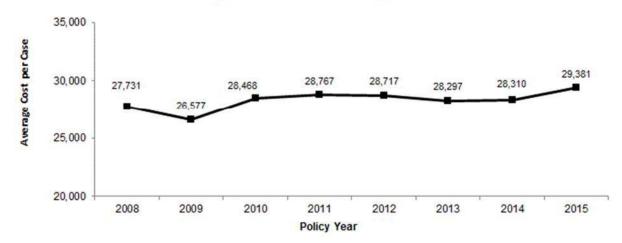

Advisory Loss Costs and Rating Values Filing – January 1, 2018 Selections Underlying the Proposed Changes

Missouri Indemnity Cost Per Case Adjusted to a Common Wage Level

Missouri Medical Cost Per Case Adjusted to a Common Wage Level

As these two charts illustrate, Missouri's average indemnity and medical cost per case have remained fairly consistent over time.

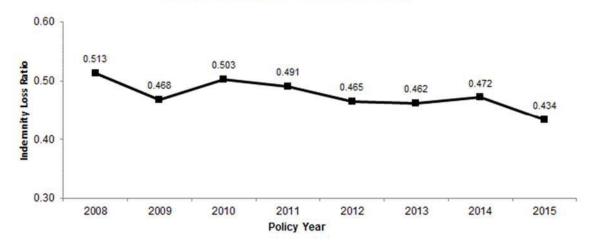

Advisory Loss Costs and Rating Values Filing – January 1, 2018

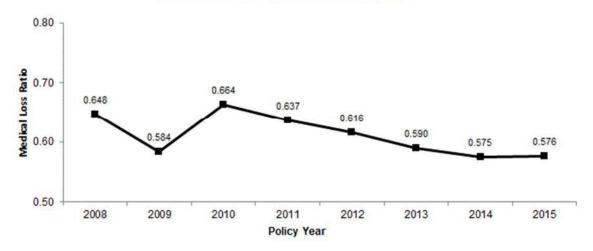

Selections Underlying the Proposed Changes

Loss ratios result after combining observed changes in Missouri's average claim frequency with corresponding changes in Missouri's average cost per case.

Missouri Indemnity Loss Ratio History

Missouri Medical Loss Ratio History

Based on our analysis this year, we are proposing no change in the annual indemnity loss ratio trend of -2.0% and a decrease in annual medical loss ratio trend from -1.0% to -1.5%.

Advisory Loss Costs and Rating Values Filing – January 1, 2018 Selections Underlying the Proposed Changes

Benefit Changes

Workers injured in Missouri receive wage replacement (indemnity) benefits at a rate of two-thirds of their pre-injury weekly wage. These benefits are subject to a weekly minimum and maximum. Each July 1, the minimum and maximum weekly benefits are updated based on Missouri's most recent state average weekly wage. The latest increase in Missouri's state average weekly wage is estimated to increase indemnity costs by 0.5% and overall system costs by 0.2%. Please see Appendix C-I for additional detail.

Loss-Based Expenses

The proposed loss costs include a provision for loss adjustment expenses (LAE). These are expenses associated with the handling of workers compensation claims. LAE is included in the loss costs by using a ratio of loss adjustment expense dollars to loss dollars (called the LAE provision). In this filing, NCCI is proposing to decrease the current voluntary LAE provision from 19.5% to 18.9% of losses. Please see Exhibit II for additional detail.

Advisory Loss Costs and Rating Values Filing – January 1, 2018

Additional Proposed Changes

Updated Terrorism Voluntary Loss Cost

As a result of NCCI's most recent analysis, the proposed terrorism loss cost per \$100 of payroll in Missouri decreased from \$0.01 to \$0.005.

Background

The Terrorism Risk Insurance Act of 2002 ("TRIA" or the "Act") was implemented since Congress recognized that terrorism is a catastrophe exposure that is real and significant for insurers of workers compensation and other lines of insurance. Each state's current terrorism Miscellaneous Value was initially based on the result of one of six modeled states.

TRIA 2002 was renewed and amended as TRIE in 2005 and as TRIPRA in 2007. NCCI submitted several Item filings over the years that proposed changes to the Miscellaneous Values, rules, and policy forms to implement these changes.

The U.S. Congress passed the Terrorism Risk Insurance Plan Reauthorization Act (TRIPRA 2015), which changed various coverage parameters for certified terrorism losses and generally increased carriers' financial responsibility (and thus decreased the U.S government's financial support). TRIPRA of 2015 is set to expire on 12/31/2020.

However, NCCI anticipated that in addition to changes in the law itself, the risk and cost of terrorism losses may have changed over time.

NCCI Analysis

NCCI worked with expert catastrophe loss modeling firms to assess the impact of terrorism risk on workers compensation insurance losses. NCCI selected results which included an estimated average terrorism workers compensation loss dollar amount per worker for each NCCI state under TRIPRA 2015 parameters and provisions.

NCCI converted those estimates from the modeling firms to a loss cost per \$100 of payroll using average weekly wage information and currently approved loss-based expense provisions, by state. NCCI relied on average weekly wage information from the Bureau of Labor Statistics Quarterly Census of Employment and Wages, and is consistent with that which NCCI uses in other areas of its filings.

The indicated terrorism Miscellaneous Value loss cost is rounded to the nearest \$0.005, and set to a minimum of \$0.005 (i.e. half-penny).

Advisory Loss Costs and Rating Values Filing – January 1, 2018

Part 2 Proposed Values

- Proposed Voluntary Loss Costs and Rating Values
- Proposed Values for Inclusion in the Experience Rating Plan Manual
- Proposed Values for Inclusion in the Retrospective Rating Plan Manual

Advisory Loss Costs and Rating Values Filing – January 1, 2018 Proposed Voluntary Loss Costs and Rating Values

The following pages include proposed voluntary loss costs and rating values:

- Voluntary loss costs, expected loss rates, and d-ratios by class code, along with associated footnotes
- Advisory miscellaneous values, such as:
 - Advisory loss elimination ratios
 - Maximum weekly payroll applicable for select class codes
 - Premium determination for Executive Officers, Members of Limited Liability Companies, Partner and Sole Proprietors
 - Terrorism advisory loss cost
 - United States Longshore and Harbor Workers' Compensation Coverage Percentage

FOOTNOTES

- a Advisory loss cost for each individual risk must be obtained from NCCI Customer Service or the Rating Organization having jurisdiction.
- D Advisory loss cost for classification already includes the specific disease loading shown in the table below. See Basic Manual Rule 3-A-7.

Disease			Disease			Disease		
Code No.	Loading	Symbol	Code No.	Loading	Symbol	Code No.	Loading	Symbol

S=Silica, L=Lead

- F Advisory loss cost provides for coverage under the United States Longshore and Harbor Workers Compensation Act and its extensions. Loss cost contains a provision for the USL&HW Assessment.
- M Risks are subject to Admiralty Law or Federal Employers Liability Act (FELA). However, the published loss cost is for risks that voluntarily purchase standard workers compensation and employers liability coverage. A provision for the USL&HW Assessment is included for those classifications under Program II USL Act.
- N This code is part of a ratable / non-ratable group shown below. The statistical non-ratable code and corresponding advisory loss cost are applied in addition to the basic classification when determining premium.

Class	Non-Ratable		
Code	Element Code		
4771	0771		
7405	7445		
7431	7453		

- P Classification is computed on a per capita basis.
- X Refer to special classification phraseology in these pages which is applicable in this state.

* Class Codes with Specific Footnotes

- Advisory loss cost includes a non-ratable disease element of \$0.57. (For coverage written separately for federal benefits only, \$0.56. For coverage written separately for state benefits only, \$0.01.)
- Advisory loss cost includes a non-ratable disease element of \$1.71. (For coverage written separately for federal benefits only, \$1.67. For coverage written separately for state benefits only, \$0.04.)
- 6702 Loss cost and rating values only appropriate for laying or relaying of tracks or maintenance of way no work on elevated railroads. Otherwise, assign appropriate construction or erection code loss cost and elr each x 1.215.
- Loss cost and rating values only appropriate for laying or relaying of tracks or maintenance of way no work on elevated railroads. Otherwise, assign appropriate construction or erection class loss cost x 1.553 and elr x 1.523.
- Loss cost and rating values only appropriate for laying or relaying of tracks or maintenance of way no work on elevated railroads. Otherwise, assign appropriate construction or erection class loss cost and elr each x 1.35.

Effective January 1, 2018

ADVISORY MISCELLANEOUS VALUES

Advisory Loss Elimination Ratios - The following percentages are applicable by deductible amount and hazard group for total losses on a per occurrence basis. They do not include a safety factor.

Total Losses							
Deductible	JP						
Amount	Α	В	С	D	Е	F	G
\$100	1.2%	0.9%	0.7%	0.5%	0.4%	0.3%	0.3%
\$200	2.3%	1.8%	1.4%	1.0%	0.8%	0.5%	0.5%
\$300	3.3%	2.6%	2.1%	1.5%	1.1%	0.8%	0.7%
\$400	4.3%	3.3%	2.7%	1.9%	1.4%	1.0%	1.0%
\$500	5.1%	4.0%	3.2%	2.3%	1.8%	1.3%	1.2%
\$1,000	8.7%	6.8%	5.6%	4.1%	3.2%	2.3%	2.1%
\$1,500	11.4%	9.0%	7.5%	5.6%	4.4%	3.2%	2.9%
\$2,000	13.6%	10.8%	9.1%	6.9%	5.4%	4.1%	3.7%
\$2,500	15.5%	12.4%	10.5%	8.0%	6.4%	4.8%	4.3%
\$5,000	22.6%	18.5%	16.0%	12.7%	10.4%	8.2%	7.2%
\$10,000	32.1%	26.9%	23.9%	19.8%	16.6%	13.6%	11.9%
\$15,000	39.1%	33.2%	30.0%	25.4%	21.6%	18.0%	15.8%
\$20,000	44.6%	38.4%	35.0%	30.1%	25.9%	21.9%	19.2%

Basis of premium applicable in accordance with **Basic Manual** footnote instructions for Code 7370 -- "Taxicab Co.":

	Employee operated vehicle	\$68,600 \$45,700
91	78 "Athletic Sports or Park: Non-Contact Sports," and Code 9179 "Athletic Sports or Park: ontact Sports"	\$900
Pr	emium Determination for Executive Officers, Members of Limited Liability Companies, ortners and Sole Proprietors in accordance with Basic Manual Rule 2-E (Annual Payroll)	\$41,100
Te	rrorism - (Advisory Loss Cost)	0.005
	nited States Longshore and Harbor Workers' Compensation Coverage Percentage applicable ly in connection with Basic Manual Rule 3-A-4	48%

(Multiply a Non-F classification loss cost by a factor of 1.48 to adjust for differences in benefits and loss-based expenses. This factor is the product of the adjustment for differences in benefits (1.40) and the adjustment for differences in loss-based expenses (1.06).)

Experience Rating Eligibility

A risk qualifies for experience rating on an intrastate basis when it meets the premium eligibility requirements for the state in which it operates. The eligibility amount varies by rating effective date. The *Experience Rating Plan Manual* should be referenced for the latest approved eligibility amounts by state and by effective date.

Advisory Loss Costs and Rating Values Filing – January 1, 2018 Proposed Values for Inclusion in the Experience Rating Plan Manual

The following pages include proposed values for the Experience Rating Plan Manual:

- Table of Weighting Values
- Table of Ballast Values
- Experience rating premium eligibility amounts

Effective January 1, 2018

For Expected Losses greater than \$6,112,000, the Ballast Value can be calculated using the following formula (rounded to the nearest 1):

Ballast = (0.10)(Expected Losses) + 2500(Expected Losses)(12.80) / (Expected Losses + (700)(12.80))

G = 12.80

NATIONAL COUNCIL ON COMPENSATION INSURANCE, INC.

MISSOURI—UPDATE TO EXPERIENCE RATING PREMIUM ELIGIBILITY AMOUNTS

EXPERIENCE RATING PLAN MANUAL—2003 EDITION RULE 2—EXPERIENCE RATING ELEMENTS AND FORMULA A. PREMIUM ELIGIBILITY

2. State Subject Premium Eligibility Amounts

A risk qualifies for experience rating when its subject premium, developed in its experience period, meets or exceeds the minimum eligibility amount shown in the State Table of Subject Premium Eligibility Amounts in Rule 2-A-2-c. Refer to Rule 2-E-1 to determine a risk's experience period.

- a. A risk qualifies for experience rating if its data within the most recent 24 months of the experience period develops a subject premium of at least the amount shown in Column A.
- b. A risk may not qualify according to Rule 2-A-2-a. If it has more than the amount of experience referenced in Rule 2-A-2-a, then to qualify for experience rating the risk must develop an average annual subject premium of at least the amount shown in Column B. Refer to Rule 2-A-3 to determine average annual subject premium.
- c. A risk's rating effective date determines the applicable Column A and Column B subject premium eligibility amounts required to qualify for experience rating. Refer to Rule 2-B for rating effective date determination.

State Table of Subject Premium Eligibility Amounts

<u>State</u>	Rating Effective Date	Column A (\$)	Column B (\$)
MO	7/1/18 and after	<u>7,500</u>	<u>3,750</u>
	7/1/17 - 6/30/18	<u>7,000</u>	<u>3,500</u>
	6/30/17 and before	7,000	<u>3,500</u>

NOTE: This exhibit revises the Missouri experience rating subject premium eligibility amounts shown in the State Table of Subject Premium Eligibility Amounts in NCCl's *Experience Rating Plan Manual* national Rule 2-A-2. The content shown in this table is not a complete replacement of the existing State Table of Subject Premium Eligibility Amounts. The premium eligibility amounts are applicable to all policies.

Advisory Loss Costs and Rating Values Filing – January 1, 2018 Proposed Values for Inclusion in the Retrospective Rating Plan Manual

The following pages include values for inclusion in the Retrospective Rating Plan Manual:

- Hazard group differentials
- Table of expected loss ranges
- Excess loss pure premium factors
- Excess loss and allocated expense pure premium factors

Hazard Group Differentials

Advisory Loss Costs and Rating Values Filing - January 1, 2018

Exhibit I – Determination of Indicated Loss Cost Level Change

NCCI uses the following general methodology to determine the indicated change based on experience, trend, and benefits for each of the policy years in the experience period:

- 1. Standard earned premium at Designated Statistical Reporting (DSR) level is developed to ultimate and on-leveled to the current approved loss cost level
- Reported indemnity and medical losses are limited by a large loss threshold, developed to ultimate using limited development factors, and on-leveled to a common benefit level to yield adjusted limited losses
- 3. Limited indemnity and medical cost ratios excluding trend and benefits are calculated as adjusted losses (step 2) divided by premium available for benefit costs (step 1)
- Trend factors are applied to the indemnity and medical cost ratios to reflect expected differences between the historical experience years and the effective period of the proposed filing
- 5. An excess provision is applied to adjust the limited cost ratios to an unlimited basis
- 6. A factor is applied to reflect the impact of proposed indemnity and medical benefit changes
- 7. The projected unlimited indemnity and medical cost ratios including benefit changes are added to yield the indicated change based on experience, trend, and benefits

The indicated change based on experience, trend, and benefits for this filing is calculated as the average of the indicated changes for each of the individual policy years in the experience period. Lastly, the impact of the change in loss-based expenses is applied. The detailed calculations can be found on the following pages.

EXHIBIT I

Determination of Indicated NCCI Including Trend Loss Cost Level Change

Section C - Indicated Change Based on Experience, Trend, and Benefits

tion D - Application of the Change in Loss-based Expenses	
ndicated Change Based on Experience, Trend, and Benefits = [(1)+(2)] / 2	0.975
Policy Year 2014 Indicated Change Based on Experience, Trend, and Benefits	0.984
Policy Year 2015 Indicated Change Based on Experience, Trend, and Benefits	0.966

(1) Indicated Loss Cost Level Change	0.975
(2) Effect of the Change in Loss-based Expenses (Exhibit II)	0.995
(3) Indicated Change Modified to Reflect the Change in Loss-based Expenses = (1) x (2)	0.970

Section E - Distribution of Overall Loss Cost Level Change to Industry Groups

Industry Group Differentials (Appendix A-IV):

Manufacturing	1.041
Contracting	0.972
Office & Clerical	0.983
Goods & Services	1.009
Miscellaneous	0.984

Applying these industry group differentials to the final overall loss cost level change produces the changes in loss cost level proposed for each group as shown:

	(1)	(2)	$(3) = (1) \times (2)$	
	Final Overall	Industry	Final Loss Cost	
	Loss Cost	Group	Level Change	
Industry Group	Level Change	Differential	by Industry Group	
Manufacturing	0.970	1.041	1.010	(+1.0%)
Contracting	0.970	0.972	0.943	(-5.7%)
Office & Clerical	0.970	0.983	0.954	(-4.6%)
Goods & Services	0.970	1.009	0.979	(-2.1%)
Miscellaneous	0.970	0.984	0.954	(-4.6%)
Overall	0.970	1.000	0.970	(-3.0%)

Advisory Loss Costs and Rating Values Filing – January 1, 2018

Exhibit II – Workers Compensation Loss Adjustment Expenses

The proposed loss costs include a provision for loss adjustment expenses (LAE).

LAE is included in the loss costs by using a ratio of loss adjustment expense dollars to loss dollars (called the LAE provision). These expenses are directly associated with the handling of workers compensation claims. The LAE provision is comprised of two components: Defense and Cost Containment Expenses (DCCE) and Adjusting and Other Expenses (AOE).

NCCI uses the following general methodology to determine the proposed LAE provision based on data for private carriers.

- Using data obtained from the NCCI Call for Loss Adjustment Expense, accident year developed LAE ratios are calculated on a countrywide basis, including separate DCCE and AOE ratio components.
- 2. A state-to-countrywide DCCE relativity is selected based on NAIC Annual Statement data.
- 3. The state-specific DCCE ratio is calculated by multiplying the countrywide-selected DCCE ratio by the state-to-countrywide DCCE relativity.
- 4. Given the nature of AOE, it cannot be allocated to a specific claim, and hence cannot be accurately attributed to specific states. Therefore, the state-specific AOE ratio reflects the latest selected countrywide provision.

Accident year developed DCCE and AOE ratios are calculated separately for the state fund. The proposed statewide LAE ratio reflects a weighted average of the selected DCCE and AOE ratios for private carriers and the state fund.

EXHIBIT II

Workers Compensation Loss Adjustment Expense Provision

NCCI has computed the loss adjustment expense allowance on an accident year basis using data obtained from the NCCI Call for Loss Adjustment Expense. For this filing, NCCI proposes a 18.9% loss adjustment expense allowance as a percentage of incurred losses.

Appendix A – Factors Underlying the Proposed Loss Cost Level Change

Appendix A-I Determination of Policy Year On-level Factors

NCCI uses premium and loss on-level factors to adjust historical policy year experience to current loss cost and benefit levels, respectively.

Premium on-level factors are adjustment factors that reflect the cumulative impact of all premium level changes that have occurred during and after the individual year being on-leveled. To calculate a weighted average, NCCI utilizes a monthly premium distribution for Missouri based on an analysis of policies reported in the Unit Statistical Data, which was updated for this filing. Additional adjustments applied as part of the premium on-level factor calculation include:

- Adjustment for Expense Removal: This factor is applied to remove expenses from the reported voluntary DSR level premium totals.
- Experience Rating Off-Balance Adjustment Factor: This factor reflects the relative difference between the average experience rating modification for the historical year being on-leveled and the average experience rating modification targeted in the filing.

Loss on-level factors are adjustment factors that reflect the cumulative impact of all benefit level changes that have occurred during and after the individual year of data being on-leveled.

Note: For NCCI ratemaking purposes, proposed benefit level changes that (i) do not impact the experience period of the filing and (ii) have not yet been approved are included in Exhibit I, rather than in the loss on-level calculation.

Additionally, for the purpose of reflecting the current loss benefit level, the impact of the decision in the case entitled *Richard Gattenby v. Treasurer of the State of Missouri – Custodian of the Second Injury Fund* has been combined with the impact of SB 1, and this combined impact is effective January 1, 2014. However, since this filing relies on losses from policy years 2014 and 2015, no adjustment for this benefit level change is needed in Appendix A-I.

Advisory Loss Costs and Rating Values Filing – January 1, 2018

Appendix A – Factors Underlying the Proposed Loss Cost Level Change

Appendix A-II Determination of Premium and Losses Developed to an Ultimate Report

Development factors are used to project premium and limited losses to an ultimate report. In general, the ultimate development factors are based on a chain-ladder approach that utilizes average link ratios for several maturities and the application of a tail factor, as shown in Appendix A-II Sections A through J.

Limited Large Loss Methodology

In order to limit volatility on the loss cost indications due to the impact of extraordinary large losses, a limited large loss methodology is used in Missouri. A base threshold for the large loss limitation is determined by the volume of premium in the state as well as the number of years used in the experience period. The base threshold proposed in this filing is \$9,794,993, based on the volume of premium in policy years 2013 and 2014 underlying the currently approved filing that utilizes data valued as of 12/31/2015. The base threshold is detrended by policy year to reflect the inflationary impact on claim costs due to wage inflation. The wage index used as a basis for these calculations is the Missouri average weekly wages from the Quarterly Census of Employment and Wages (QCEW). Detrended thresholds are used in the experience period, trend period, and loss development period. Indemnity and medical losses are limited at the detrended large loss threshold corresponding to their policy year, as shown in Appendix A-II Section L.

Limited indemnity and medical losses used to calculate the ultimate losses are shown in Appendix A-II Section A. After developing limited indemnity and medical losses to an ultimate report, a statewide excess ratio at the base threshold is used to adjust the limited losses to an unlimited basis. The proposed excess ratio in this filing is 0.6%, as shown in Appendix A-II Section K.

Development Factors

For premium development, link ratios are used from 1st report through 5th report. It is assumed that no further development occurs after the 5th report.

For indemnity and medical loss development, link ratios calculated from limited losses are used from 1st report through the 19th report.

For indemnity and medical loss development past the 19th report, a "tail" factor is used to reflect all future expected emergence. The calculation of indemnity and medical paid + case 19th-to-ultimate tail factors utilize all available experience for the years prior to the tail attachment point. Tail factors are calculated for the most recent ten available policy years, each relying on losses in older policy years as well as a factor to adjust for the differences in the volume of losses

Advisory Loss Costs and Rating Values Filing – January 1, 2018

Appendix A – Factors Underlying the Proposed Loss Cost Level Change

between the policy years. Tail factors are calculated separately for indemnity and medical losses by comparing the changes in the volume of policy year losses that occur on policy years reported after a nineteenth report to the volume of policy year losses at the nineteenth report, along with the application of a growth adjustment factor.

Since unlimited losses are used for the tail factor, they are adjusted to a limited basis as shown in Appendix A-II Section H.

^{*} November 27, 2018 is the midpoint of the effective period for which the revised loss costs are being proposed.

Advisory Loss Costs and Rating Values Filing – January 1, 2018

Appendix A – Factors Underlying the Proposed Loss Cost Level Change

Appendix A-III Trend Factors

NCCI separately analyzes a measure of the number of workplace injuries (claim frequency) and the average indemnity and medical costs of each of these injuries (claim severity). Premium, lost-time claim counts, and losses used in these frequency and severity calculations are developed to ultimate and adjusted for changes in the level of workers' wages over time using the United States Bureau of Labor Statistics Quarterly Census of Employment and Wages for Missouri. Note that medical-only claim counts are excluded from the claim frequency and severity calculations, but the losses associated with medical-only claims are included.

While claim frequency and average costs per case are reviewed separately, NCCI selects annual indemnity and medical loss ratio trend factors based on an analysis of historical indemnity and medical loss ratios, along with other pertinent considerations, including, but not limited to, changes in system benefits and administration, economic environment, credibility of state data, and prior trend approach and selection.

The lost-time claim frequency, average costs per case, and loss ratios for Policy Years 2001 through 2015 are shown in Appendix A-III, along with the impact of the trend selection for each policy year in the experience period. The trend lengths displayed in Section B(3) are calculated by comparing the average accident date for the effective period of the proposed loss costs to each of the policy years in the experience period. The average accident dates are based on a Missouri distribution of policy writings by month and assume a uniform probability of loss over the coverage period.

^{*} Figures have been adjusted to the common wage level. ^ Based on an average of paid and paid+case losses.

APPENDIX A-IV

Derivation of Industry Group Differentials

Industry group differentials are used to more equitably distribute the overall loss cost level change based on the individual experience of each industry group. The payroll, losses and claim counts used in the calculations below are from NCCI's Workers Compensation Statistical Plan (WCSP) data.

I. Expected Losses

The current expected losses (columns (1) and (2)) are the payroll extended by the pure premiums underlying the latest approved loss costs. The proposed expected losses (3) are the current expected losses adjusted to the proposed level. These adjustments include the proposed experience, trend, benefit and, if applicable, loss-based expense changes as well as any miscellaneous premium adjustments.

APPENDIX A-IV

II. Industry Group Differentials

To calculate the converted indicated balanced losses (11) the reported losses are limited to \$500,000 for a single claim occurrence and \$1,500,000 for each multiple claim occurrence. After the application of limited development, trend and benefit factors, the limited losses are brought to an unlimited level through the application of the expected excess provision. The proposed experience change, applicable loss-based expenses and any miscellaneous premium adjustments are applied to calculate the indicated losses. These indicated losses are then balanced to the expected losses using the factors shown in Appendix B-I, Section A-3.

Industry Group	(11) Converted Indicated Balanced Losses	(12) Indicated/ Expected Ratio (11)/[(8)x(10)]	(13) Indicated Differential (12)IG/(12)SW	(14) Lost-Time Claim Counts
Manufacturing	819,402,590	1.043	1.042	17,942
Contracting	774,103,466	0.972	0.971	10,316
Office & Clerical	481,421,156	0.983	0.982	9,971
Goods & Services	1,272,439,226	1.011	1.010	30,948
Miscellaneous	787,704,010	0.986	0.985	13,634
Statewide	4,135,070,448	1.001		

	(15)	(16)	(17) Credibility Weighted	(18)

Advisory Loss Costs and Rating Values Filing - January 1, 2018

Appendix B – Calculations Underlying the Loss Cost Change by Classification

NCCI separately determines voluntary loss costs for each workers compensation classification. The proposed change from the current loss cost will vary depending on the classification. The following are the general steps utilized to determine the individual classification loss costs:

- Calculate industry group differentials, which are used to more equitably distribute the proposed overall average loss cost level change based on the individual experience of each industry group
- 2. For each classification, determine the indicated pure premiums based on the most recently-available five policy periods of Missouri payroll and loss experience
- 3. Indicated pure premiums are credibility-weighted with present on rate level pure premiums and national pure premiums to generate derived by formula pure premiums
- 4. Final adjustments include the application of a test correction factor, the ratio of manual-to-standard premium, and swing limits.

APPENDIX B-I

Distribution of Loss Cost Level Change to Occupational Classification

After determining the required changes in the overall loss cost level for the state and by industry group, the next step in the ratemaking procedure is to distribute these changes among the various occupational classifications. In order to do this, the pure premiums by classification must be adjusted, by policy period, industry group, or on an overall basis, to incorporate the changes proposed in the filing. There are three sets of pure premiums for each classification: indicated, present on rate level, and national pure premiums.

Section A – Calculation of Indicated Pure Premiums

The indicated pure premiums are calculated from the payroll and loss data reported, by class code and policy period, in the Workers Compensation Statistical Plan (WCSP) for the latest available five policy periods. Various adjustments are made to these pure premiums to put them at the level proposed in this filing (Sections A-1 to A-3).

Section A-1 – Calculation of Primary Conversion Factors

1. Limited Loss Development Factors

The following factors are applied to develop the losses from first through fifth report to an ultimate basis.

	Indemnity		Medical	
Policy Period	Likely-to-Develop	Not-Likely-to- Develop	Likely-to-Develop	Not-Likely-to-Develop
7/10-6/11	1.108	1.016	1.111	1.009
7/11-6/12	1.166	1.025	1.117	1.006
7/12-6/13	1.249	1.046	1.133	1.004
7/13-6/14	1.415	1.104	1.157	1.006
7/14-6/15	1.770	1.212	1.251	1.016

2. Factors to Adjust to the Proposed Trend Level

The proposed trend factors are applied to adjust the losses to the proposed level.

Policy Period	Indemnity	Medical
7/10-6/11	0.860	0.894
7/11-6/12	0.878	0.907
7/12-6/13	0.896	0.921
7/13-6/14	0.914	0.935
7/14-6/15	0.933	0.949

3. Factors to Adjust to the July 1, 2017 Benefit Level

The following factors are applied to adjust the losses to the proposed benefit level.

		Permanent Total	Permanent Partial	Temporary Total	
Policy Period	Fatal	(P.T.)	(P.P.)	(T.T.)	Medical
7/10-6/11	1.039	1.039	1.087	1.039	1.000
7/11-6/12	1.035	1.035	1.076	1.035	1.000
7/12-6/13	1.028	1.028	1.061	1.028	1.000
7/13-6/14	1.018	1.018	1.042	1.018	1.000
7/14-6/15	1.013	1.013	1.031	1.013	1.000

APPENDIX B-I

4. Primary Conversion Factors: Indicated Pure Premiums

The factors above, contained within Section A-1, are combined multiplicatively, resulting in the following factors for the Likely-to-Develop (L) and Not-Likely-to-Develop (NL) groupings.

Policy Period	Fatal (L)	Fatal (NL)	P.T.*	P.P. (L)	P.P. (NL)	T.T. (L)	T.T. (NL)	Medical (L)	Medical (NL)
7/10-6/11	0.990	0.908	0.990	1.036	0.950	0.990	0.908	0.993	0.902
7/11-6/12	1.060	0.931	1.060	1.102	0.968	1.060	0.931	1.013	0.912
7/12-6/13	1.150	0.963	1.150	1.187	0.994	1.150	0.963	1.043	0.925
7/13-6/14	1.317	1.027	1.317	1.348	1.051	1.317	1.027	1.082	0.941
7/14-6/15	1.673	1.145	1.673	1.703	1.166	1.673	1.145	1.187	0.964

^{*} Permanent total losses are always assigned to the Likely-to-Develop grouping.

Section A-2 – Expected Excess Provision and Redistribution

After the application of the primary conversion factors, the limited losses are brought to an expected unlimited level through the application of excess loss factors by hazard group. These factors are shown below.

Hazard Group	Α	В	С	D	E	F	G
(1) Excess Ratios	0.057	0.082	0.101	0.122	0.156	0.182	0.234
(2) Excess Factors 1/(1-(1))	1.060	1.089	1.112	1.139	1.185	1.222	1.305

As the excess loss factors are on a combined (indemnity and medical) basis, a portion (40%) of the indemnity expected excess losses are redistributed to medical in order to more accurately allocate expected excess losses. Since a portion of the expected excess losses are redistributed in an additive manner, the expected excess factors shown above cannot be combined multiplicatively with either the primary or secondary loss conversion factors.

APPENDIX B-I

Section A-3 - Calculation of Secondary Conversion Factors

1. Factors to Adjust for Proposed Industry Group Differentials

The following factors are applied to adjust the indicated industry group differentials for the effects of credibility weighting the industry group differentials and weighting the differentials by the latest year expected losses.

	Manufacturing	Contracting	Office and Clerical	Goods and Services	Miscellaneous
(1) Indicated Differentials*	1.042	0.971	0.982	1.010	0.985
(2) Final Differentials**	1.041	0.972	0.983	1.009	0.984
(3) Adjustment (2)/(1)	0.999	1.001	1.001	0.999	0.999

^{*}See Appendix A-IV, column (13).

2. Factors to Balance Indicated to Expected Losses

The expected losses are calculated as the pure premium underlying the current loss costs, adjusted to the proposed level and adjusted for the Experience Rating Plan off-balance. The indicated losses are balanced to the expected losses by applying the following factors.

	(1)				
	Adjustment of	(2)	(3)	(4)	(5)
	Indicated Losses	Current Ratio of	Proposed Ratio of		Balancing
	to Pure Premium	Manual to	Manual to	Off-balance	Indicated to
	at Proposed	Standard	Standard	Adjustment	Expected Losses
Policy Period	Level	Premium	Premium	(2)/(3)	(1)x(4)
7/10-6/11	0.973	1.092	1.072	1.019	0.991
7/11-6/12	1.016	1.092	1.082	1.009	1.025
7/12-6/13	0.980	1.093	1.105	0.989	0.969
7/13-6/14	0.970	1.092	1.120	0.975	0.946
7/14-6/15	0.958	1.093	1.130	0.967	0.926

3. Adjustment for Experience Change

A factor of 0.983 is applied to adjust for the experience change in the proposed loss cost level.

4. Factor to Reflect the Proposed Loss-Based Expense Provisions

A factor of 1.189 is applied to include the proposed loss-based expense provisions.

5. Secondary Conversion Factors: Indicated Pure Premiums

The factors above, contained within section A-3, are combined multiplicatively, resulting in the following factors:

Policy Period	Manufacturing	Contracting	Office and Clerical	Goods and Services	Miscellaneous
7/10-6/11	1.157	1.159	1.159	1.157	1.157
7/11-6/12	1.197	1.199	1.199	1.197	1.197
7/12-6/13	1.131	1.134	1.134	1.131	1.131
7/13-6/14	1.105	1.107	1.107	1.105	1.105
7/14-6/15	1.081	1.083	1.083	1.081	1.081

^{**}See Appendix A-IV, column (18).

APPENDIX B-I

Section B – Calculation of Present on Rate Level Pure Premiums

The present on rate level pure premiums are the pure premiums underlying the current loss costs, adjusted to the proposed level. The data sources for the above-captioned pure premiums are the partial pure premiums underlying the current loss costs.

1. Adjustment for Experience Change

A factor of 0.983 is applied to adjust for the experience change in the proposed loss cost level.

2. Factors to Adjust to the Proposed Trend Level

The pure premiums underlying the current loss costs contain the current trend. The change in trend factors, 1.000 and 0.982, for indemnity and medical, respectively, are applied to adjust to the proposed trend level.

3. Factors to Adjust to the July 1, 2017 Benefit Level

The pure premiums underlying the current loss costs are at the current February 28, 2017 level. The following factors are applied to adjust to the proposed benefit level.

Effective Date	Indemnity	Medical
July 1, 2017	1.005	1.000

4. Factors to Include the Proposed Loss-Based Expense Provisions

The pure premiums underlying the current loss costs include the current loss-based expense provisions and must be adjusted to the proposed level.

	(a) C	(a) Current		posed
	Indemnity	Medical	Indemnity	Medical
(1) Loss Adjustment Expense	1.195	1.195	1.189	1.189
(2) Overall Change (1b)/(1a)			0.995	0.995

5. Adjustment to Obtain Expected Losses

The pure premiums underlying the current loss costs reflect the current Experience Rating Plan off-balance. The change in off-balance must be applied.

	(1)	(2)	(3)
	Current Ratio of	Proposed Ratio of	Off-balance
	Manual to Standard	Manual to Standard	Adjustment
Industry Group	Premium	Premium	(1)/(2)
Manufacturing	1.199	1.222	0.981
Contracting	1.106	1.107	0.999
Office & Clerical	1.104	1.117	0.988
Goods & Services	1.033	1.048	0.986
Miscellaneous	1.060	1.067	0.993

APPENDIX B-I

6. Factors to Adjust for Proposed Industry Group Differentials

The pure premiums underlying the current loss costs are adjusted by the proposed industry group differentials.

	(1)	(2)	(3)
	Final	Adjustment to Proposed for	Adjusted Differential
Industry Group	Differential*	Current Relativities**	(1)x(2)
Manufacturing	1.041	1.000	1.041
Contracting	0.972	0.999	0.971
Office & Clerical	0.983	1.001	0.984
Goods & Services	1.009	1.001	1.010
Miscellaneous	0.984	0.999	0.983

^{*}See Appendix A-IV, column (18).
**See Appendix A-IV, column (10).

7. Combined Conversion Factors

The factors above, contained within Section B, are combined multiplicatively, resulting in the following factors.

Industry Group	Indemnity	Medical
Manufacturing	1.004	0.980
Contracting	0.954	0.931
Office & Clerical	0.956	0.933
Goods & Services	0.979	0.956
Miscellaneous	0.960	0.937

APPENDIX B-I

Section C - Calculation of National Pure Premiums

Finally, there are the national pure premiums, which reflect the countrywide experience for each classification adjusted to state conditions. These pure premiums reflect the countrywide experience for each classification as indicated by the latest available individual classification experience for all states for which the National Council on Compensation Insurance compiles workers compensation data.

Countrywide data is adjusted to Missouri conditions in four steps. First, statewide indicated pure premiums are determined for Missouri. Second, using Missouri payrolls as weights, corresponding statewide-average pure premiums are computed for each remaining state. Third, the ratios of Missouri statewide pure premiums to those for other states are used as adjustment factors to convert losses for other states to a basis that is consistent with the Missouri indicated pure premiums. The quotient of the countrywide total of such adjusted losses divided by the total countrywide payroll for the classification is the initial pure premium indicated by national relativity. Finally, national pure premiums are balanced to the level of the state indicated pure premiums to ensure unbiased derived by formula pure premiums. Indemnity and medical pure premiums are computed separately.

Section D - Calculation of Derived by Formula Pure Premiums

The indicated, present on rate level and national pure premiums are credibility weighted, and the resulting derived by formula pure premiums are used to determine the final class loss costs.

As for the preceding pure premiums, separate computations are performed for each partial pure premium: indemnity and medical. Each partial formula pure premium is derived by the weighting of the indicated, present on rate level and national partial pure premiums. The weight assigned to the policy year indicated pure premium varies in one-percent intervals from zero percent to one hundred percent, depending upon the volume of expected losses (i.e. the product of the underlying pure premiums and the payroll in hundreds). To achieve full state credibility, a classification must have expected losses of at least: \$17,601,637 for indemnity and \$11,890,151 for medical.

The partial credibilities formula is:

 $z = [(expected losses) / (full credibility standard)]^{0.4}$

For the national pure premiums, credibility is determined from the number of lost-time claims. Full credibility standards are: 1,150 lost-time claims for indemnity and 1,000 lost-time claims for medical.

Partial credibilities are assigned using a credibility formula similar to that used for indicated pure premiums but based on the number of national cases. In no case is the national credibility permitted to exceed 50% of the complement of the state credibility.

National Credibility equals the smaller of:

[(national cases)/(full credibility standard)]0.4 and [(1 – state credibility)/2]

The residual credibility (100% minus the sum of the state and national credibilities) is assigned to the present on rate level pure premium.

For example, if the state credibility is 40%, the national pure premium is assigned a maximum credibility of 30% ((100-40) / 2). The remainder is assigned to the present on rate level pure premium.

The total pure premium shown on the attached Appendix B-III is obtained by adding the indemnity and medical partial pure premiums obtained above and rounding the sum to two decimal places.

APPENDIX B-II

Adjustments to Obtain Loss Costs

The following items are combined with the derived by formula pure premium to obtain the proposed loss cost:

1. Test Correction Factor

The payrolls are now extended by the loss costs presently in effect and by the indicated loss costs to determine if the required change in manual premium level as calculated in Exhibit I has been achieved. Since at first this calculation may not yield the required results, an iterative process is initiated which continuously tests the proposed loss costs including tentative test correction factors until the required change in manual premium level is obtained. The test correction factor is applied to the derived by formula pure premiums.

The factors referred to above are set out as follows:

	Test Correction
	Factor
Manufacturing	1.0116
Contracting	1.0060
Office & Clerical	1.0026
Goods & Services	0.9979
Miscellaneous	1.0084

2. Ratios of Manual to Standard Premiums

The ratios of manual to standard premiums by industry group have also been excluded from the classification experience, and it is necessary to apply these factors to the derived by formula pure premiums.

	Ratio of Manual
	to Standard
	Premiums
Manufacturing	1.222
Contracting	1.107
Office & Clerical	1.117
Goods & Services	1.048
Miscellaneous	1.067

3. Disease Loadings

The proposed manual loss costs shown in this filing include specific disease loadings for those classifications where they apply. The proposed specific disease loadings are shown on the footnotes page.

APPENDIX B-II

4. Swing Limits

As a further step, a test is made to make certain that the proposed loss costs fall within the following departures from the present loss costs:

Manufacturing	from 21% above to 19% below
Contracting	from 14% above to 26% below
Office & Clerical	from 15% above to 25% below
Goods & Services	from 18% above to 22% below
Miscellaneous	from 15% above to 25% below

These limits have been calculated in accordance with the following formula:

Max. Deviation = Effect of the final change in loss cost level by industry group plus or minus 20% rounded to the nearest 1%.

The product of the swing limits and the present loss cost sets bounds for the proposed loss cost. If the calculated loss cost falls outside of the bounds, the closest bound is chosen as the proposed loss cost. When a code is limited, the underlying pure premiums are adjusted to reflect the limited loss cost. The classifications which have been so limited are shown below. Note that classifications that are subject to special handling may fall outside of the swing limits.

An illustrative example showing the calculation of a proposed manual class loss cost is attached as Appendix B-III. This example demonstrates the manner in which the partial pure premiums are combined to produce a total pure premium, and shows the steps in the calculation at which the rounding takes place. The loss costs for other classifications are calculated in the same manner.

List of Classifications Limited by the Upper Swing

List of Classifications Limited by the Lower Swing

1438	2503	2600	2683	2709	2797	2799	3114	0079	1472	1654	2305	2702	3042	3085	3303
3180	3574	4240	4493	4581	5223	5705	7431	3719	4109	4110	4111	6233	6236	8755	
7453	7711	8602	8856	9600											

5. Missouri Contracting Classification Premium Adjustment Program (CCPAP)

For classifications eligible for the CCPAP, the last step in producing the final proposed loss costs is to apply a factor of 1.093 to offset the credits payable under the CCPAP.

A list of the eligible class codes can be found under the *Basic Manual* Miscellaneous Rules.

APPENDIX B-III

Derivation of Proposed Loss Cost - Code 8810

As previously explained in Appendix B-I, the indicated pure premiums are developed by adjusting the limited losses by a set of conversion factors. The converted losses are then summarized into indemnity and medical and then divided by payroll (in hundreds). The derivation of the indicated pure premium for the above-captioned classification follows:

LIMITED LOSSES (Workers Compensation Statistical Plan)

				Permanent	Permanent	Temporary	Temporary		
	Fatal	Fatal	Permanent	Partial	Partial	Total	Total	Medical	Medical
Policy Period	Likely	Not-Likely	Total	Likely	Not-Likely	Likely	Not-Likely	Likely	Not-Likely

EXPECTED EXCESS PROVISION AND REDISTRIBUTION (Appendix B-I, Section A-2)

After the application of the primary conversion factors, the limited losses are brought to an expected unlimited level through the application of a hazard group-specific excess loss factor. The factor is shown below:

	HAZARD GROUP: C
Excess Factor	1.112

As the excess loss factor is on a combined (indemnity and medical) basis, the following portion of the indemnity expected excess losses are redistributed to medical in order to more accurately allocate expected excess losses:

Redistribution %	40%

APPENDIX B-III

Derivation of Proposed Loss Cost - Code 8810

07/01/14 - 06/30/15	23,233,857,932	4,069,096	6,795,470	4,150,834	12,855,800	10,864,566	17,006,634	27,871,200
Total	113,585,198,463	20,431,828	33,613,489	22,265,332	64,553,468	54,045,317	86,818,800	140,864,117
<u> </u>	·		NDICATED PL	JRE PREMIUM	0.048	0.076	0.12	

The present on rate level pure premiums are developed by adjusting the pure premiums underlying the current loss cost by the conversion factors calculated in Appendix B-I. The derivation of the present on rate level pure premiums for the above-captioned classification follows:

	Indemnity	Medical	Total
Pure Premiums Underlying Current Loss Cost	0.047	0.083	0.13
Conversion Factors (App. B-I, Section B)	0.956	0.933	XXX
PURE PREMIUMS PRESENT ON RATE LEVEL			
(Underlying Pure Premiums) x (Conversion Factor)	0.045	0.077	0.12

APPENDIX B-III

Derivation of Proposed Loss Cost - Code 8810

Industry Group - Office and Clerical, Hazard Group - C

The loss cost for the above-captioned classification is derived as follows:

		Indemnity	<u>Medical</u>	<u>Total</u>
1.	Indicated Pure Premium	0.048	0.076	0.12
2.	Pure Premium Indicated by National Relativity	0.045	0.073	0.12
3.	Pure Premium Present on Rate Level	0.045	0.077	0.12
4.	State Credibilities	100%	100%	XXX
5.	National Credibilities	0%	0%	xxx
6.	Residual Credibilities = 100% - (4) - (5)	0%	0%	xxx
7.	Derived by Formula Pure Premiums = $(1) \times (4) + (2) \times (5) + (3) \times (6)$	0.048	0.076	0.12
8.	Test Correction Factor	1.0026	1.0026	XXX
9.	Underlying Pure Premiums = (7) x (8) *	0.044	0.076	0.12
10.	Ratio of Manual to Standard Premium			1.117
11.	Loss Cost = (9) x (10)			0.13
12.	Loss Cost Within Swing Limits			0.13
	Current Loss Cost x Swing Limits a) Lower bound = $0.14 \times 0.750 = 0.11$ b) Upper bound = $0.14 \times 1.150 = 0.16$			
13.	Pure Premiums Underlying Proposed Loss Cost* = ((13TOT) / (9TOT)) x (9), (13TOT) = (12) / (10)	0.044	0.076	0.12
14.	Disease, Catastrophe and/or Miscellaneous Loadings			0.00
15.	Final Loaded Loss Cost			0.13

^{*} Indemnity pure premium is adjusted for the rounded total pure premium: Indemnity Pure Premium = Total Pure Premium - Medical Pure Premium

APPENDIX B-IV

I. Determination and Distribution of Premium Level Change to "F" Classifications

The Workers Compensation Statistical Plan (WCSP) data is used to determine the overall "F" classifications (F-class) premium level change as well as the individual change by the various classifications. There are three sets of pure premiums for each classification: indicated, present on rate level, and national pure premiums. All sets of pure premiums are adjusted to the common proposed level that is explained further in this exhibit. These three sets of pure premiums are credibility weighted and the results, the derived by formula pure premiums, are adjusted for additional proposed components (Section II) to determine the indicated loss costs. The payrolls are extended by the loss costs presently in effect and by the indicated loss costs. The loss costs are limited to the swing limits based on 20% above and 20% below the current loss costs. This results in the indicated loss cost level change of -8.7%.

Section A - Calculation of F-Class Indicated Pure Premiums

The payroll and loss data reported are from the WCSP data by class code for the latest available five policy periods.

Section A-1 – Calculation of Primary Conversion Factors

1. Factors to Adjust to the Proposed Benefit Levels

The state losses are adjusted to the July 1, 2017 state law level. The federal losses are adjusted to the October 1, 2016 federal law level.

STATE ACT

		Permanent Total	Permanent Partial	Temporary Total	
Policy Period	Fatal	(P.T.)	(P.P.)	(T.T.)	Medical
1/10 - 12/10	1.040	1.040	1.088	1.040	1.000
1/11 - 12/11	1.037	1.037	1.081	1.037	1.000
1/12 - 12/12	1.032	1.032	1.070	1.032	1.000
1/13 - 12/13	1.024	1.024	1.051	1.024	1.000
1/14 - 12/14	1.016	1.016	1.038	1.016	1.000

FEDERAL ACT

Bullio Bulliol	Edd	Permanent Total	Permanent Partial	Temporary Total	NA - C I
Policy Period	Fatal	(P.T.)	(P.P.)	(1.1.)	Medical
1/10 - 12/10	1.028	1.023	1.009	1.023	1.000
1/11 - 12/11	1.023	1.019	1.008	1.019	1.000
1/12 - 12/12	1.017	1.015	1.006	1.015	1.000
1/13 - 12/13	1.013	1.011	1.004	1.011	1.000
1/14 - 12/14	1.010	1.008	1.003	1.008	1.000

2. Factors to Adjust to the Proposed Trend Level

The following factors are applied to trend the losses in each policy year to the proposed rating year. The selected annual trends utilized were 0.980 and 0.985 for indemnity and medical, respectively.

Policy Period	Indemnity	Medical
1/10 - 12/10	0.851	0.886
1/11 - 12/11	0.868	0.900
1/12 - 12/12	0.886	0.913
1/13 - 12/13	0.904	0.927
1/14 - 12/14	0.922	0.941

APPENDIX B-IV

Section A-1 Calculation of Primary Conversion Factors (continued)

3. Limited Loss Development Factors

The following factors are applied to develop the losses from first through fifth report to an ultimate basis utilizing countrywide data.

	Inde	mnity	Medical		
Policy Period	Likely- to-Develop	Not-Likely- to-Develop	Likely- to-Develop	Not-Likely- to-Develop	
1/10 - 12/10	1.107	1.021	1.205	1.017	
1/11 - 12/11	1.152	1.038	1.213	1.021	
1/12 - 12/12	1.260	1.097	1.277	1.044	
1/13 - 12/13	1.455	1.214	1.365	1.049	
1/14 - 12/14	2.500	1.747	1.680	1.113	

4. Primary Conversion Factors = (1) x (2) x (3)

The factors above contained within Section A-1, are combined multiplicatively, resulting in the following factors for the Likely-to-Develop (L) and Not-Likely-to-Develop (NL) groupings.

\sim	_ ^	_	_	Α.	\sim	-
S	1 //		_	Δ		

	Fatal	Fatal		P.P.	P.P.	T.T.	T.T.	Medical	Medical
Policy Period	(L)	(NL)	P.T.*	(L)	(NL)	(L)	(NL)	(L)	(NL)
1/10 - 12/10	0.980	0.904	0.980	1.025	0.945	0.980	0.904	1.068	0.901
1/11 - 12/11	1.037	0.934	1.037	1.081	0.974	1.037	0.934	1.092	0.919
1/12 - 12/12	1.152	1.003	1.152	1.195	1.040	1.152	1.003	1.166	0.953
1/13 - 12/13	1.347	1.124	1.347	1.382	1.153	1.347	1.124	1.265	0.972
1/14 - 12/14	2.342	1.637	2.342	2.393	1.672	2.342	1.637	1.581	1.047

FEDERAL ACT

	Fatal	Fatal		P.P.	P.P.	T.T.	T.T.	Medical	Medical
Policy Period	(L)	(NL)	P.T.*	(L)	(NL)	(L)	(NL)	(L)	(NL)
1/10 - 12/10	0.968	0.893	0.964	0.951	0.877	0.964	0.889	1.068	0.901
1/11 - 12/11	1.023	0.922	1.019	1.008	0.908	1.019	0.918	1.092	0.919
1/12 - 12/12	1.135	0.988	1.133	1.123	0.978	1.133	0.987	1.166	0.953
1/13 - 12/13	1.332	1.112	1.330	1.321	1.102	1.330	1.110	1.265	0.972
1/14 - 12/14	2.328	1.627	2.323	2.312	1.616	2.323	1.624	1.581	1.047

^{*} Permanent Total losses are always assigned to the Likely-to-Develop grouping.

APPENDIX B-IV

Section A-2 – Expected Excess Provision and Redistribution

To reduce distortions in individual class loss cost indications, individual claim amounts are subject to a maximum limit of \$500,000. Multiple claim accidents are limited to three times the individual claim loss limitation. After the application of the primary conversion factors, the limited losses are brought to an expected unlimited level through the application of excess loss factors by hazard group. These factors are shown below.

Hazard Group	А	В	С	D	E	F	G
(1) Excess Ratios	0.057	0.082	0.101	0.122	0.156	0.182	0.234
(2) Excess Factors 1/(1-(1))	1.060	1.089	1.112	1.139	1.185	1.222	1.305

As the excess loss factors are on a combined (indemnity and medical) basis, a portion (40%) of the indemnity expected excess losses are redistributed to medical in order to more accurately allocate expected excess losses. Since a portion of the expected excess losses are redistributed in an additive manner, the expected excess factors shown above cannot be combined multiplicatively with either the primary or secondary loss conversion factors.

Section A-3 – Calculation of Secondary Conversion Factors

The following factors are applied to include the proposed loss-based expenses. The state losses are adjusted to reflect the proposed loss-based expenses. The federal losses are adjusted to reflect the proposed USL&HW Special Fund Assessment and loss adjustment expense. The combined** factors are based on a combined indemnity and medical loss-weighted average of the above loss-based expenses by policy period.

Policy Period	State Act	Federal Act
1/10 - 12/10	1.189	1.239
1/11 - 12/11	1.189	1.262
1/12 - 12/12	1.189	1.266
1/13 - 12/13	1.189	1.208
1/14 - 12/14	1.189	1.238

^{**} See Section B.3 for the indemnity and medical breakdown of the proposed loss-based expenses.

APPENDIX B-IV

Section B - Present on Rate Level

1. Benefits

The current underlying pure premiums are at the current February 28, 2017 state and October 1, 2015 federal law levels. These pure premiums are adjusted to reflect the weighted effect of state and federal laws which bring losses to the proposed July 1, 2017 state and October 1, 2016 federal law levels. The distribution of state and federal losses in regard to total losses was used to determine the weighted effects.

State Weight (St%)	0.687
Federal Weight (Fed%)	0.313

	Indemnity	Medical	Total
(a) State Laws	1.005	1.000	1.002
(b) Federal Laws	1.002	1.000	1.001
(c) Weighted Laws = [(a)xSt%] + [(b)xFed%]	1.004	1.000	1.002

2. Trend

Since the trend in the current underlying pure premiums is adequate for the current rating year, additional trend is applied to bring the underlyings to the proposed rating year.

Indemnity	Medical
0.980	0.985

APPENDIX B-IV

Section B – Present on Rate Level (continued)

3. Loss-Based Expenses

The current underlying pure premiums are adjusted to reflect the change in the weighted effect of the loss-based expense provisions.

Proposed:

STATE ACT

	Indemnity	Medical	Total
(a) Loss Adjustment Expense	1.189	1.189	1.189
(b) Loss-Based Assessment	1.000	1.000	1.000
(c) Total = (a) + (b) - 1	1.189	1.189	1.189

FEDERAL ACT

	Indemnity	Medical	Total
(d) Loss Adjustment Expense	1.189	1.189	1.189
(e) Loss-Based Assessment	1.119	1.000	1.071
(f) Total = (d) + (e) - 1	1.308	1.189	1.260

	Indemnity	Medical	Total
(g) Weighted Proposed Expenses = [(c) x St%] + [(f) x Fed%]	1.226	1.189	1.211

Current:

STATE ACT

	Indemnity	Medical	Total
(h) Loss Adjustment Expense	1.195	1.195	1.195
(i) Loss-Based Assessment	1.000	1.000	1.000
(j) Total = (h) + (i) - 1	1.195	1.195	1.195

FEDERAL ACT

	Indemnity	Medical	Total
(k) Loss Adjustment Expense	1.195	1.195	1.195
(I) Loss-Based Assessment	1.116	1.000	1.064
(m) Total = (k) + (l) - 1	1.311	1.195	1.259

	Indemnity	Medical	Total
(n) Weighted Current Expenses = [(j) x St%] + [(m) x Fed%]	1.231	1.195	1.215

Change:

	Indemnity	Medical	Total
Weighted Expense Change in Loss-Based Expenses = [(g) / (n)]	0.996	0.995	0.997

4. Conversion Factors = $(1) \times (2) \times (3)$

The factors have been applied multiplicatively resulting in the following factors.

Indemnity	Medical
0.980	0.980

APPENDIX B-IV

Section C – National Pure Premiums

The latest three years of state and federal losses for states in which NCCI compiles workers compensation data are separately adjusted to the same level as the indicated and present on rate level pure premiums.

Class Code 9077

For Code 9077, the indicated, national and present on rate level pure premiums were calculated as described previously in Sections A, B and C but using the non-appropriated benefit changes and the federal loss-based expenses.

Section D - Derived by Formula Pure Premiums

The derived by formula pure premiums are calculated by a process similar to that of the industrial codes, which is described in Appendix B-I, Section D. To achieve full state credibility, a classification must have expected losses of at least: \$58,785,150 for indemnity and \$26,426,000 for medical.

II. Calculation of Proposed Loss Costs

The following items are combined with the derived by formula pure premiums to obtain the proposed loss cost:

A. Test Correction Factor	1.0000
B. Ratio of Manual Premium to Earned Premium (determined on a countrywide basis)	1.112

C. Swing Limits

No classifications were adjusted on account of swing limits.

APPENDIX B-IV

Derivation of Proposed Loss Cost - Code 7317

The indicated pure premiums are developed by adjusting the limited losses by a set of conversion factors. The converted losses are then summarized into indemnity and medical and then divided by payroll (in hundreds). The derivation of the indicated pure premium for the above-captioned classification follows:

STATE ACT - LIMITED LOSSES (Workers Compensation Statistical Plan)

APPENDIX B-IV

Derivation of Proposed Loss Cost - Code 7317

EXPECTED EXCESS PROVISION AND REDISTRIBUTION (Appendix B-IV, Section A-2)

After the application of the primary conversion factors, the limited losses are brought to an expected unlimited level through the application of a hazard group-specific excess loss factor. The factor is shown below:

	HAZARD GROUP: G
Excess Factor	1.305

As the excess loss factor is on a combined (indemnity and medical) basis, the following portion of the indemnity expected excess losses are redistributed to medical in order to more accurately allocate expected excess losses:

Redistribution %	40%

STATE ACT - EXPECTED UNLIM LOSSES (Lim Losses x Primary Conv Factors, then adjusted for the Excess Provision and Redistribution)

				Permanent	Permanent	Temporary	Temporary		
	Fatal	Fatal	Permanent	Partial	Partial	Total	Total	Medical	Medical

		NDICATED PU	JRE PREMIUN	1	1.807	2.563	4.37	

The present on rate level pure premiums are developed by adjusting the pure premiums underlying the current loss cost by the conversion factors. The derivation of the present on rate level pure premiums for the above-captioned classification follows:

	Indemnity	Medical	Total
Pure Premiums Underlying Current Loss Cost	3.884	3.416	7.30
Conversion Factors (Section B)	0.980	0.980	XXX
PURE PREMIUMS PRESENT ON RATE LEVEL			
(Underlying Pure Premiums) x (Conversion Factor)	3.806	3.348	7.15

APPENDIX B-IV

Derivation of Proposed Loss Cost - Code 7317

Industry Group - F-Class, Hazard Group - G

The loss cost for the above-captioned classification is derived as follows:

		Indemnity	<u>Medical</u>	<u>Total</u>
1.	Indicated Pure Premium	1.807	2.563	4.37
2.	Pure Premium Indicated by National Relativity	4.563	3.669	8.23
3.	Pure Premium Present on Rate Level	3.806	3.348	7.15
4.	State Credibilities	13%	17%	XXX
5.	National Credibilities	36%	39%	xxx
6.	Residual Credibilities = 100% - (4) - (5)	51%	44%	xxx
7.	Derived by Formula Pure Premiums = $(1) \times (4) + (2) \times (5) + (3) \times (6)$	3.819	3.340	7.16
8.	Test Correction Factor	1.0000	1.0000	xxx
9.	Underlying Pure Premiums = (7) x (8) *	3.820	3.340	7.16
10.	Ratio of Manual to Standard Premium			1.112
11.	Loss Cost = (9) x (10)			7.96
12.	Loss Cost Within Swing Limits			7.96
	Current Loss Cost x Swing Limits a) Lower bound = $7.91 \times 0.800 = 6.33$ b) Upper bound = $7.91 \times 1.200 = 9.49$			
13.	Pure Premiums Underlying Proposed Loss Cost* = ((13TOT) / (9TOT)) x (9) , (13TOT) = (12) / (10)	3.820	3.340	7.16
14.	Disease, Catastrophe and/or Miscellaneous Loadings			0.00
15.	Final Loaded Loss Cost			7.96

^{*} Indemnity pure premium is adjusted for the rounded total pure premium: Indemnity Pure Premium = Total Pure Premium - Medical Pure Premium

APPENDIX B-V

Derivation of Proposed Traumatic Loss Cost - Code 1016

As previously explained in Appendix B-I, the indicated pure premiums are developed by adjusting the limited losses by a set of conversion factors. The converted losses are then summarized into indemnity and medical and then divided by payroll (in hundreds). The derivation of the indicated pure premium for classification 1016 follows:

LIMITED LOSSES (Workers Compensation Statistical Plan)

Policy Period	Fatal Likely	Fatal Not-Likely	Permanent Total	Permanent Partial Likely	Permanent Partial Not-Likely	Temporary Total Likely	Temporary Total Not-Likely	Medical Likely	Medical Not-Likely
07/01/10 - 06/30/11	0	0	0	0	0	0	0	0	0
07/01/11 - 06/30/12	0	0	0	0	0	0	0	0	0
07/01/12 - 06/30/13	0	0	0	0	0	0	0	0	0
07/01/13 - 06/30/14	0	0	0	0	0	0	0	0	0
07/01/14 - 06/30/15	0	0	0	0	0	0	0	0	0

PRIMARY PARTIAL CONVERSION FACTORS (Appendix B-I, Section A-1)

				Permanent	Permanent	Temporary	Temporary		
	Fatal	Fatal	Permanent	Partial	Partial	Total	Total	Medical	Medical
Policy Period	Likely	Not-Likely	Total	Likely	Not-Likely	Likely	Not-Likely	Likely	Not-Likely
07/01/10 - 06/30/11	0.990	0.908	0.990	1.036	0.950	0.990	0.908	0.993	0.902
07/01/11 - 06/30/12	1.060	0.931	1.060	1.102	0.968	1.060	0.931	1.013	0.912
07/01/12 - 06/30/13	1.150	0.963	1.150	1.187	0.994	1.150	0.963	1.043	0.925
07/01/13 - 06/30/14	1.317	1.027	1.317	1.348	1.051	1.317	1.027	1.082	0.941
07/01/14 - 06/30/15	1.673	1.145	1.673	1.703	1.166	1.673	1.145	1.187	0.964

EXPECTED EXCESS PROVISION AND REDISTRIBUTION (Appendix B-I, Section A-2)

After the application of the primary conversion factors, the limited losses are brought to an expected unlimited level through the application of a hazard group-specific excess loss factor. The factor is shown below:

	HAZARD GROUP: G
Excess Factor	1.305

As the excess loss factor is on a combined (indemnity and medical) basis, the following portion of the indemnity expected excess losses are redistributed to medical in order to more accurately allocate expected excess losses:

Redistribution %	40%

APPENDIX B-V

Derivation of Proposed Traumatic Loss Cost - Code 1016

EXPECTED UNLIMITED LOSSES (Limited Losses x Primary Conversion Factors, then adjusted for the Excess Provision and Redistribution)

Policy Period	Fatal Likely	Fatal Not-Likely	Permanent Total	Permanent Partial Likely	Permanent Partial Not-Likely	Temporary Total Likely	Temporary Total Not-Likely	Medical Likely	Medical Not-Likely
07/01/10 - 06/30/11	0	0	0	0	0	0	0	0	0
07/01/11 - 06/30/12	0	0	0	0	0	0	0	0	0
07/01/12 - 06/30/13	0	0	0	0	0	0	0	0	0
07/01/13 - 06/30/14	0	0	0	0	0	0	0	0	0
07/01/14 - 06/30/15	0	0	0	0	0	0	0	0	0

SECONDARY PARTIAL CONVERSION FACTOR (Loss-based expense, if applicable)

	Indemnity	Medical
Loss Based Expense	1.189	1.189

PAYROLL, FINAL CONVERTED LOSSES (Expected Unlimited Losses x Loss-Based Expenses, if applicable)

		Indemnity	Indemnity	Medical	Medical	Total	Total	
Policy Period	Payroll	Likely	Not-Likely	Likely	Not-Likely	Indemnity	Medical	Total
07/01/10 - 06/30/11	23,458	0	0	0	0	0	0	0
07/01/11 - 06/30/12	0	0	0	0	0	0	0	0
07/01/12 - 06/30/13	0	0	0	0	0	0	0	0
07/01/13 - 06/30/14	0	0	0	0	0	0	0	0
07/01/14 - 06/30/15	10,773	0	0	0	0	0	0	0
Total	34,231	0	0	0	0	0	0	0
INDICATED PURE PREMIUM			0.000	0.000	0.00			

The present on rate level pure premiums are developed by adjusting the pure premiums underlying the current loss cost by the conversion factors calculated in Appendix B-I. The derivation of the present on rate level pure premiums for the above-captioned classification follows:

	Indemnity	Medical	Total
Pure Premiums Underlying Current Loss Cost	4.233	4.257	8.49
Conversion Factors *	1.000	0.977	XXX
PURE PREMIUMS PRESENT ON RATE LEVEL			
(Underlying Pure Premiums) x (Conversion Factor)	4.233	4.159	8.39

^{*} Conversion factors only adjust for changes in trend, benefit, and if applicable, loss-based expense provision.

APPENDIX B-V

Derivation of Proposed Traumatic Loss Cost - Code 1016

COAL MINING—NOC, Hazard Group - G

The traumatic loss cost for classification 1016 is derived as follows:

		Indemnity	Medical	<u>Total</u>
1.	Indicated Pure Premium	0.000	0.000	0.00
2.	Pure Premium Indicated by National Relativity	4.573	3.853	8.43
3.	Pure Premium Present on Rate Level	4.233	4.159	8.39
4.	State Credibilities+	1%	2%	XXX
5.	National Credibilities	49%	49%	XXX
6.	Residual Credibilities = 100% - (4) - (5)	50%	49%	xxx
7.	Derived by Formula Pure Premiums = (1) x (4) + (2) x (5) + (3) x (6)	4.357	3.926	8.28
8.	Voluntary Offset	1.000	1.000	xxx
9.	Underlying Pure Premiums = (7) x (8) *	4.354	3.926	8.28
10.	Ratio of Manual to Standard Premium			1.067
11.	Loss Cost = (9) x (10)			8.83
12.	Loss Cost Within Swing Limits			8.83
	Current Loss Cost x Swing Limits a) Lower bound = $9.00 \times 0.80 = 7.20$ b) Upper bound = $9.00 \times 1.20 = 10.80$			
13.	Pure Premiums Underlying Proposed Loss Cost* = ((13TOT) / (9TOT)) x (9) , (13TOT) = (12) / (10)	4.354	3.926	8.28
14.	Proposed Traumatic Loss Cost			8.83

[†] To achieve full state credibility, the classification must have expected losses of at least: \$55,232,280 for indemnity, and \$21,900,287 for medical.

^{*} Indemnity pure premium is adjusted for the rounded total pure premium:

Indemnity Pure Premium = Total Pure Premium - Medical Pure Premium

Advisory Loss Costs and Rating Values Filing – January 1, 2018

Appendix C – Memoranda for Laws and Assessments

Appendix C provides details on changes affecting workers compensation benefit costs that are not yet reflected in the on-level factors shown in Appendix A-I. Such changes may result from annual updates in the state average weekly wage, medical reimbursement levels, or other recurring changes that directly affect worker compensation benefit levels. In addition, changes to the administration of the workers compensation system, including benefit levels, may result from specific regulatory, legislative, or judicial action.

The following changes affecting Missouri benefit levels are detailed in this section of the filing:

- Impact of the Change in the Missouri Average Weekly Wage, Effective July 1, 2017
- Longshore and Harbor Workers' Compensation Act
 - Change in the Minimum and Maximum Weekly Benefits, Effective October 1, 2016
 - Annual Assessment

APPENDIX C-I

Change in the Minimum and Maximum Weekly Benefits, Effective July 1, 2017

In Missouri, maximum and, for certain benefit types, minimum workers compensation indemnity benefit provisions are dependent upon the state average weekly wage (SAWW). The impacts summarized in the table below result from anticipated changes in workers compensation costs due to the change in the SAWW from \$867.88 ("current") to \$879.06 ("revised"), and apply to injuries occurring on or after July 1, 2017.

The approach used in calculating the effects of a change in the SAWW is as follows:

- 1. Obtain the latest available SAWW from the Division of Workers' Compensation.
- 2. Calculate the minimum and maximum benefits by benefit payment type that are dependent upon and expressed as a percentage of the current and revised SAWW.
- 3. Using a countrywide distribution of workers and their wages¹, indexed to the Missouri average weekly wage², determine expected current and revised average weekly benefits by benefit payment type (and dependency type, as appropriate)³.
- 4. Use the above-calculated average weekly benefits to determine the indemnity benefit costs for each injury type (Fatal, Permanent Total, Permanent Partial, and Temporary Total)⁴ prior to and subsequent to the change in the SAWW. Calculate the ratio of the revised indemnity benefit costs to current indemnity benefit costs for each injury type to determine the impact by injury type from the change in the SAWW.
- 5. Determine the indemnity cost distribution by injury type⁵.
- 6. Using the indemnity cost distribution (Step 5) and the effects by injury type (Step 4), calculate the effect of the change in SAWW on total indemnity benefit costs.
- 7. Multiply the impact on total indemnity benefit costs (Step 6) by the percentage of losses attributed to indemnity benefits⁶ to determine the impact of the change in the SAWW on overall benefit costs.

Type of Injury	Percentage of Losses	Effect (%)
Fatal	2.5%	+ 0.2
Permanent Total	2.2%	+ 0.2
Permanent Partial	29.6%	+ 0.6
Temporary Total	8.8%	+ 0.2
Total Indemnity	43.1%	+ 0.5
Medical	56.9%	0.0
Total	100.0%	+ 0.2

¹ Based on NCCI Detailed Claim Information data.

² Forecasted using the Bureau of Labor Statistics Quarterly Census of Employment and Wages, for all private sector employment, and adjusted to reflect injured workers.

³ For states where the rate of compensation is based on spendable wages, state and federal tax withholding tables are used in conjunction with pertinent assumptions (e.g., number of dependents).

⁴ Various distributions based on internal and external data are employed in determining the impact by type of injury. For example, for Fatal injuries, a countrywide distribution of average ages and dependents by type (e.g., spouse, spouse with one child, parent, etc.) is used in calculating mortality-adjusted annuity values under both the current and revised weekly maximum benefits, with the likelihood of remarriage incorporated as applicable.

⁵ NCCI Unit Statistical Plan data for the 24-month policy period ending 06/30/2014 on the 07/01/2016 law level and developed to an ultimate basis by type of injury.

⁶ NCCI Financial Call data for Missouri for Policy Years 2014 and 2015 projected to 07/01/2017.

APPENDIX C-II

Longshore and Harbor Workers' Compensation Act

Change in the Minimum and Maximum Weekly Benefits, Effective October 1, 2016

In the Longshore And Harbor Workers' Compensation Act, maximum and, for certain benefit types, minimum workers compensation indemnity benefit provisions are dependent upon the national average weekly wage (NAWW). The impacts summarized in the table below result from anticipated changes in workers compensation costs due to the change in the NAWW from \$703.00 ("current") to \$718.24 ("revised"), and apply to injuries occurring on or after October 1, 2016.

The approach used in calculating the effects of a change in the NAWW is as follows:

- 1. Obtain the latest available NAWW from the United States Department of Labor, Division of Longshore and Harbor Workers' Compensation (DLHWC).
- 2. Calculate the minimum and maximum benefits by benefit payment type that are dependent upon and expressed as a percentage of the current and revised NAWW.
- 3. Using a countrywide distribution of workers and their wages¹, indexed to the Longshore And Harbor Workers' Compensation Act average weekly wage², determine expected current and revised average weekly benefits by benefit payment type (and dependency type, as appropriate)³.
- 4. Use the above-calculated average weekly benefits to determine the indemnity benefit costs for each injury type (Fatal, Permanent Total, Permanent Partial, and Temporary Total) prior to and subsequent to the change in the NAWW. Calculate the ratio of the revised indemnity benefit costs to current indemnity benefit costs for each injury type to determine the impact by injury type from the change in the NAWW.
- 5. Determine the indemnity cost distribution by injury type⁵.
- 6. Using the indemnity cost distribution (Step 5) and the effects by injury type (Step 4), calculate the effect of the change in NAWW on total indemnity benefit costs.
- 7. Multiply the impact on total indemnity benefit costs (Step 6) by the percentage of losses attributed to indemnity benefits to determine the impact of the change in the NAWW on overall benefit costs.

Type of Injury	Percentage of Losses	Effect (%)
Fatal	3.8%	+ 0.4
Permanent Total	2.2%	+ 0.3
Permanent Partial	45.7%	+ 0.1
Temporary Total	8.1%	+ 0.3
Total Indemnity	59.8%	+ 0.2
Medical	40.2%	0.0
Total	100.0%	+ 0.1

¹ Based on NCCI Detailed Claim Information data.

² Bureau of Labor Statistics Quarterly Census of Employment and Wages, for all private sector employment, and adjusted to reflect injured workers.

³ For states where the rate of compensation is based on spendable wages, state and federal tax withholding tables are used in conjunction with pertinent assumptions (e.g., number of dependents).

⁴ Various distributions based on internal and external data are employed in determining the impact by type of injury. For example, for Fatal injuries, a countrywide distribution of average ages and dependents by type (e.g., spouse, spouse with one child, parent, etc.) is used in calculating mortality-adjusted annuity values under both the current and revised weekly maximum benefits, with the likelihood of remarriage incorporated as applicable.

⁵ NCCI Unit Statistical Plan data for the 36-month policy period ending 12/31/2013 on the 10/01/2015 law level and developed to an ultimate basis by type of injury.

APPENDIX C-III

U.S. Longshore and Harbor Workers' Compensation Act Assessment

The F-class and Program II, Option II maritime class voluntary loss costs include the following provision for the federal assessment:

	Brookdown of Lossos Under the Longshore and Harbor Workers Act	
3.)	Assessment Rate on Indemnity Losses (1) / (2)	11.9%
2.)	Compensation Payments Reported (on indemnity only) in 2016 *	959,394,551
1.)	Estimated Total Expense Needed for 2017 *	114,000,000

Breakdown of Losses Under the Longshore and Harbor Workers Act

4.)	Indemnity Losses (Combination of 1st through 3rd reports) #	44,796,736
5.)	Medical Losses (Combination of 1st through 3rd reports) #	30,153,455
6.)	Total Losses (4) + (5)	74,950,191
7.)	Assessment Rate on Total Losses { (3) x (4) } / (6)	7.1%

- NCCI Affiliate List
- Key Contacts

Advisory Loss Costs and Rating Values Filing – January 1, 2018

Definitions

Accident Year (AY): A loss accounting definition in which experience is summarized by the calendar year in which an accident occurred.

Calendar Year (CY):

- 1. The 12-month period beginning January 1 and ending December 31.
- 2. Method of accounting for all financial transactions occurring during a specific year.

Case Reserves: Reserves that an insurance company establishes for specific (known) claims.

DSR Level Premium: The standard earned premium that would result if business were written at NCCI state-approved loss costs or rates instead of at the company rates. It is the common benchmark level at which carriers report premium on the Financial Calls.

Frequency: The number of lost-time claims per million dollars of on-leveled, wage-adjusted premium.

Incurred Claim Count: The total of all claims reported, whether open or closed, as of a given valuation date. An indemnity claim is associated with a payment or case reserve for an indemnity loss (i.e., lost work time-related benefits) and excludes claims closed without an indemnity payment.

Lost-time Claims: Claims where an injured employee has received wage replacement benefits due to a compensable workplace injury.

Limited Losses: Losses that result after the application of NCCI's large loss procedure—in which individual large claims are limited to jurisdiction and year-specific large loss thresholds.

On-Level Factor: Applied to historical premiums and losses to adjust the historical experience to reflect approved loss cost/rate level changes as well as statutory benefit level changes implemented since that time.

Paid+Case Losses: The sum of paid losses and case reserves. Also known as "case incurred losses."

Paid Losses: Losses that an insurance company has paid as a result of claim activity.

Policy Year:

- The one-year period beginning with the effective date or anniversary of a policy.
- A premium and loss accounting definition in which experience is summarized for all
 policies with effective dates in a given calendar year period.

Severity: The average cost per case (claim) calculated as ultimate losses divided by ultimate lost-time claim counts.

Advisory Loss Costs and Rating Values Filing – January 1, 2018

Definitions

Ultimate Development Factor: For an aggregation of data, an estimate of the development that will occur between the data's current valuation date and the time when all claims are closed.

Unlimited Losses: Losses that have not been limited to jurisdiction and year-specific large loss thresholds as part of NCCI's large loss procedure.

Valuation Date: The date that premiums and losses are evaluated for reporting purposes. Premiums and losses may change over time from initial estimates to final values. Therefore, interim snapshots have associated valuation dates.

Wage Level Adjustment Factor: The ratio of the average workers' wages during the most recent time period to the average workers' wages during a historical time period.

Jefferson City, Missouri 65102

Re: Missouri Advisory Loss Costs and Rating Values Filing Proposed Effective January 1, 2018

Dear Director Lindley-Myers:

In accordance with the applicable statutes and regulations of the state of Missouri, we are filing advisory voluntary loss costs for Missouri to be effective January 1, 2018 for new and renewal policies.

This filing proposes an average overall change of -3.0% in the voluntary loss costs from the August 1, 2017 NCCI Voluntary Loss Costs Including Trend. Enclosed are the NCCI Voluntary Loss Costs Including Trend proposed to be effective January 1, 2018.

Please note the following in connection with this filing:

- As a result of Item B-1397, effective January 1, 2008, a single combined loss cost is still calculated for Class Codes 7710 and 7711 via a payroll-weighted average of the separately indicated loss costs for these two Class Codes.
- As a result of Item B-1435, effective January 1, 2018:
 - Class Codes 1642 and 1655 are combined to reflect the first year of a three-year transition program. In the third year of the transition, Class Code 1655 will be discontinued.
 - Class Codes 1701, 1741 and 1853 are combined to reflect the first year of a two-year transition program. In the second year of the transition, Class Codes 1741 and 1853 will be discontinued.
 - Class Codes 1860, 4279, and 4282 are combined to reflect the first year of a two-year transition program. In the second year of the transition, Class Codes 1860 and 4282 will be discontinued.
 - Class Code 2534 is discontinued and the loss cost for Class Code 2501 is payroll weighted to reflect the combined experience of Class Codes 2501 and 2534.
 - Class Codes 2791 and 2841 are combined to reflect the first year of a two-year transition program. In the second year of the transition, Class Code 2791 will be discontinued.

11430 Gravois Road, Suite 310 St. Louis, MO 63126-3635 www.ncci.com

- Class Code 3175 is discontinued and the loss cost for Class Code 3169 is payroll weighted to reflect the combined experience of Class Codes 3169 and 3175.
- Class Code 3223 is discontinued, and Class Code 3180 is established with its loss cost reflecting the combined experience of Class Codes 3180 and 3223.
- Class Codes 4053 and 4061 are discontinued and the loss cost for Class Code 4062 is payroll weighted to reflect the combined experience of Class Codes 4053, 4061 and 4062.
- Class Code 4113 is discontinued and the loss cost for Class Code 4111 is payroll weighted to reflect the combined experience of Class Codes 4111 and 4113.
- Class Code 4439 is discontinued and the loss cost for Class Code 4558 is payroll weighted to reflect the combined experience of Class Codes 4439 and 4558.
- Class Code 4597 is discontinued and the loss cost for Class Code 4557 is payroll weighted to reflect the combined experience of Class Codes 4557 and 4597.
- Class Codes 5040 and 5067 are combined to reflect the first year of a three-year transition program. In the third year of the transition, Class Code 5067 will be discontinued.
- Class Code 5069 is discontinued and the loss cost for Class Code 5059 is payroll weighted to reflect the combined experience of Class Codes 5059 and 5069.
- Class Codes 5505 and 5506 are combined to reflect the first year of a three-year transition program. In the third year of the transition, Class Code 5505 will be discontinued.
- Class Codes 7228, 7229, and 7250 are discontinued and the loss cost for Class Code 7219 is established and payroll weighted to reflect the combined experience of Class Codes 7228, 7229 and 7250.
- Class Code 7225 is established
- As a result of Item R-1413, the retrospective rating plan parameters were updated.

I hereby certify that I am familiar with the insurance laws, rules and regulations of the State of Missouri, and to the best of my knowledge, information, and belief, this filing complies in all respects to such laws, rules, and regulations. This filing is made on behalf of the members and subscribers of the National Council on Compensation Insurance, Inc., who are now writing or will write workers compensation insurance in Missouri.

This filing is made exclusively on behalf of the companies that have given valid consideration for the express purpose of fulfilling regulatory rate or pure premium filing requirements and other private use of this information.

In the enclosed appendix is a list of companies, which as of the time this filing is submitted, are eligible to reference this information. The inclusion of a company on this list merely indicates that the company, or the group to which it belongs, is affiliated with NCCI in this state, or has licensed this information as a non-affiliate, and is not intended to indicate whether the company is currently writing business or is even licensed to write business in this state.

Please contact me (314-843-4001) if you have any questions or need any further information.

Respectfully submitted,

Carla Townsend

State Relations Executive
